50 Isagenix Shake Recipes

I created some of these shake recipes and collected others from Pinterest. There is no order to these and I haven't tried them all.

Be careful what you add to your shake if you are trying to lose weight.

The amount of water and ice can vary. Start with less and add more as you go.

I like to use an IsaBlender with 8 oz of water and my husband uses a regular blender with 14 oz of water.

If you don't have an IsaBlender, the Hamilton Beach Personal Single Serve Blender on Amazon is less expensive and works nicely.

Keep It Simple

If you are just getting started with Isagenix you should stick to drinking the Isalean or Isalean Pro Shakes with only water and ice.

These shakes have the right macro nutrients to feed your body perfect nutrition.

It may take a week to get adjusted to drinking meal replacement shakes if you are accustomed to eating processed foods.

Adding additional ingredients to the shakes is not necessary unless you have very specific fitness goals.

You can add Isagenix Fruits, Isagenix Greens, Amped Hydrate, or powdered Ionix Supreme without concern as they will give you a new taste without adding anything that will derail your progress.

Don't Add Sugar

Be particularly cautious about adding honey, juice, or fruits high in sugar such as bananas until you reach your weight loss goals.

If you think your shake needs to be a little sweeter try adding organic stevia before adding fruit.

Berries are good for your first experiment with changing shake flavors because they are low in sugar.
2 Scoops = 1 Shake Packet

1. **Green Smoothie**: 2 scoops Vanilla Isalean Shake and 1 serving Isagenix Greens

2. **Fruit Smoothie**: 2 scoops Vanilla Isalean Shake and 1 serving Isagenix Fruits
